Multiple-criteria decision analysis - Wikipedia

The VIKOR method is a multi-criteria decision making (MCDM) or multi-criteria decision analysis method. It was originally developed by Serafim Opricovic to solve decision problems with conflicting and noncommensurable (different units) criteria, assuming that compromise is

rank or choose between alternatives is a natural decision-making approach as old as human history (see famous quotes). However, 'traditional' decision-making - and how most people make their everyday decisions - usually involves weighting the criteria and evaluating trade-offs in an intuitive or holistic manner.
