The product of uncertainty involved in the determination of position and momentum simultaneously is greater or equal to $\hbar/2$. $\Delta x \Delta p_x \geq \hbar/2$. $\Delta E \Delta t \geq \hbar/2$. Significance: Probability replaces Exactness An event which is impossible to occur according to classical physics has a finite probability of occurrence according to Quantum Mechanics 9 ...

Analytical solutions of the Schrödinger equation for the Rosen-Morse potential are presented for arbitrary orbital angular momentum quantum number by using an approximation for the centrifugal term. The energy eigenvalues and the corresponding wavefunctions are approximately obtained. Three special cases the s-wave, the Eckart potential and the PT-symmetric Rosen-Morse potential are also ...
